

Google Fu & Social Media

Google is a powerful resource in pentesting and ethical hacking. To aid our search process, search for "google search syntax" on Google or go to this link <https://ahrefs.com/blog/google-advanced-search-operators/>. This website gives tips on how to narrow your google searches to refine your results.

It's a good tip to read the information on that website.

Social media has a plethora of information that could give us a better idea of the structure of an organization and its weak links (employees).
